

Questions and Responses – PART II

FRFP NNG14476256R

13. The Performance Evaluation Plan for the above referenced solicitation (NNG14476256R) includes both services and end-item task reference. Is it the Government's intent to issue both service and end items task under the IDIQ?

ANSWER: It is the Government's intent to have services and end-item tasks under this contract.

14. In a previous response to question, the Government provided answer to Question #83 was:

“The Government will issue a Transition/Phase-in Task Order upon contract award. The Government intends to award the task order based on proposed costs for the Transition/Phase-in Plan submitted with your proposal.”

The Phase-in/Transition has two aspects; the actual transition activities to prepare for taking over of the contract and then at maintenance cutover full responsibilities for the ECS and ECHO, Earthdata, URS and S-NPP systems.

Will the Government issue one Task Order (TO) that includes all transition and O&M activities or will there be multiple TOs such as exists today on the EED contract to cover O&M of ECS and ECHO, EarthData, URS and S-NPP?

ANSWER: The transition task order will include transition activities such that at successful completion, O&M activities would begin under future task orders.

15. Would the Government consider changing the page count for the Mission Suitability Volume to 125 pages since there are a number of evaluation criteria that must be addressed in each RTO?

ANSWER: The Government does not intend to increase the page limitation, therefore the page limitation for Mission Suitability remains at 100 pages.

16. The following NASA policy directives or procedural requirements documents referenced in Attachment M are either no longer available or superseded. Can NASA please provide the most current applicable documents?

1. NPD 1440.5H – NASA Records Management has been superseded with NPD 1440.6I. It is no longer available on-line.
2. NPD 2800.1B – Managing Information Technology. There are two lines. NPD 2800.1B expired on 3/2008. IT has been superseded by NPR 2800.2.
3. NM2810-64 – NASA Interim Directive: Information Technology Security and Efficiency Requirements has been superseded by NPD2810.1D.
4. NITR 2800_2 Email Services and Email Forwarding expired on 09/18/2013.

5. NITR 2800_1 NASA Information Technology Waiver Requirements and Procedures expired 03/20/2014.

6. NITR 2830-1B Networks in NASA internet Protocol (IP) Space or NASA Physical Space expired on 09/09/2011.

ANSWER: The Government is working on updating this document. A revised Attachment M will be posted in a future Amendment.
